

## Hydrogeologically Vulnerable Areas Santa Rosa, California

Preliminary Subject to Change

SWRCB's Division of Clean Water Programs developed the draft Hydrogeologically Vulnerable Areas Map in response to the Governor's Executive Order D-5-99 to identify areas, which, because of hydrogeologic conditions, are more vulnerable to groundwater contamination from MTBE and other potential contaminants.

Basemaps were modified from Department of Water Resources (2000). Background data used on basemaps provided by the U.S. Bureau of Reclamation. For more information about this map, visit: [www.swrcb.ca.gov/cwphome/ust/usthmpg.htm](http://www.swrcb.ca.gov/cwphome/ust/usthmpg.htm)
